Q. No.	Answer all the questions	Marks	CO Mapping	BT Level
1.	WAP in C to create two threads. The Main thread will take a series of integers as input and send the first half of the series to Thread-1 and second half to Thread-2. Thread-1 will sort the elements in ascending order and return it back to Main, where Thread-2 will sort the elements in descending order and return it back to Main. The Main thread will print these arrays on screen.	10	CO2, CO3, CO4	Apply
